

# autolock AV3 Heritage Plus

Automatic multi-point locking

NEW

# autolock AV3 Heritage Plus

Automatic locking with enhanced visual value

Modern multi-point locking system with a heritage cylinder position, comparable to a traditional eye-level cylinder pull. The autolock AV3 Heritage Plus automatically locks when the door is closed without the need for you to lock it with a key.

The new practical daytime latch can be activated for times when flexible entry from outside is required without the use of a key.

Security. Weather Tightness. Convenience  
Everything a door locking system should be.

**Door open:** Weatherseal hook and hook retracted.

**Door closed:** The weatherseal hook activates, the hook extends ...

... and engages deep into the keep rail.

---

### Winkhaus Plus

---

- + Automatic locking once the door is closed providing instant security
  - + New duo hook for more security and dynamic contact pressure
  - + Magnetic trigger minimises traces of wear on the door frame
  - + Innovative optional daytime latch for flexible entry without use of a key
  - + Protective surface coating in excess of EN 1670:2007 Grade 4.
  - + PAS24 & ADQ compliant
  - + High performance central gearbox tested to 100,000 cycles and offers lowest possible operating forces.
  - + Compatibility with Winkhaus' XR6-51 Kitemark cylinder & Heritage Duo Pull to meet PAS 24 & TS007 3 star security requirements
  - + Compatibility with FAB integrated lever slave lock for double entrance doors
- 

### Available in 2 versions:

The mechanical version: **autoLock AV3 Heritage Plus**

The motorised version: **blueMatic AV3-E Heritage Plus**

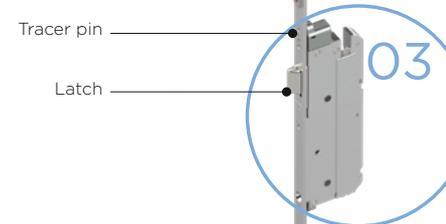

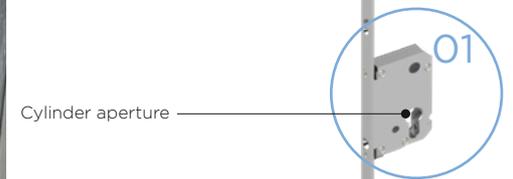

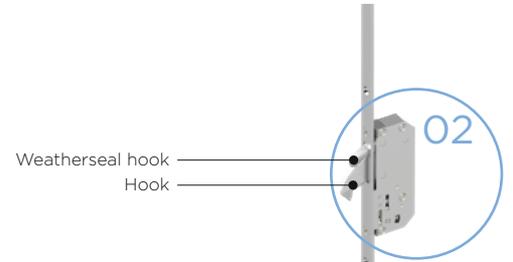

# autolock AV3 Heritage Plus

## Key Features

# 01

### The heritage position

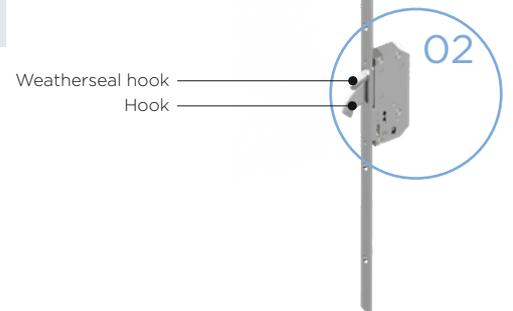

The Winkhaus AV3 Heritage Plus has the cylinder located at eye level. Operated externally, a quarter turn of the key retracts the hooks to open the door. Winkhaus' Heritage Duo Pull security escutcheon complements AV3 Heritage Plus on traditional & contemporary doors.

# 02

### The new duo hook.

The new automatic multi-point locking retains its solid hook, which automatically throws when the door is closed. Combined with the expertly designed weatherseal hook, the door sash is held even more firmly in its position, thus providing protection against weather influences whilst retaining smooth operating forces.

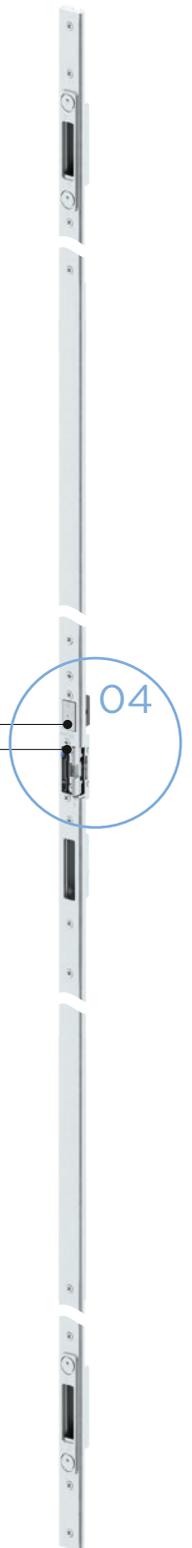

# 03

## The central AV3 gearbox

Whilst key operable from the higher heritage position, the centrally positioned gearbox houses the latch & tracer pins providing superior compression, weather resistance and operation. The central gearbox allows the use of Winkhaus' FAB integrated lever slave lock double entrance doors. The innovative AV3 magnet located in the central position only activates the tracer pin once the door is fully closed eliminating scratching to the door frame.

Magnetic trigger  
Daytime latch

# 04

## The new daytime latch.

The innovative day time latch allows you to open the door from the outside without a key. Winkhaus is the only manufacturer of automatic multi-point locking systems to offer this with the combination of Duo Hook & single-handed operation. Single hand actuation for flexible entry, useful when instant access is needed over a short period of time.

## blueMatic AV3-E Heritage Plus

Locks automatically. Opens by remote control.

In addition to automatic locking, the new blueMatic AV3-E Heritage Plus system provides motorised unlocking. From the outside the opening of the door can take place by means of wireless remote control, fingerprint, transponder, or Bluetooth.

The versatility and easy integration with all access control systems make it suitable for many different residences, from elderly housing to apartments.

Unlock the door by **fingerprint** ...

... contact-free by **remote control**

... or by **mobile phone**.

---

### Winkhaus Plus

---

- + Contact-free unlocking of doors with motorised components via all access control systems
  - + Retrofitting of autoLock AV3 Heritage plus to blueMatic AV3-E Plus made possible with modular design
  - + Control via all access control systems (wireless, fingerprint, transponders etc.) and/or with a potential-free contact
  - + Simple electrical installation
